An enhancement is coming to the already successful launch of our Contractor Bond Program. Brokers can now obtain bonds instantaneously through the new Trisura Contractor Bond Portal.

**Q:** Remind me, what is the Trisura Contractor Bond Program and when was it launched?

**A:** The Trisura Contractor Bond Program was launched in July 2015. This program has been transferred to our portal, an online resource designed to deliver a reliable and convenient experience for brokers. Brokers can apply for, purchase, and receive a bond instantaneously through the portal.

**Q:** What’s the difference between Trisura Online’s Contractor Portal and the manual version previously used?

**A:** The underwriting parameters are exactly the same. You will receive the same outcome through Trisura Online as you would have from your local underwriter. However, Trisura Online gives you, the broker, more control and flexibility in administering the account.

**Q:** Tell me about the capacity. What are the limits available on the Contractor Bond Portal?

**A:** The annual fee is $2,500 for all Trisura Online contract bond accounts. The limits available are $500,000 single job contract value and $1,000,000 in total bonded contracts. If the bond exceeds these limits, you can still request through Trisura Online. The request will be routed to your local Trisura underwriter who will determine the course of action.
