

ASSOCIATION & AFFINITY BUSINESS

TRISURA KNOWS ASSOCIATIONS

Many large groups and associations can benefit from a customized program solution. This requires an insurance company with experience in this niche, and the creativity and flexibility needed to craft an ideal solution. Our Association & Affinity Business team works collaboratively to develop insurance programs that serve the group's unique needs. When considering which markets to talk to when looking at marketing an association or affinity group program, Trisura's dedicated Association & Affinity Business team should be your first call.

TRISURA ONLINE

Certain groups may benefit from the Association Program module of Trisura Online, our web-based insurance platform. It's designed to maintain underwriting integrity while reducing the time and cost to quote, issue and service the members of your Association clients. Trisura Online provides a true self-service solution whereby program participants complete their application and payment online, and receive their coverage certificate immediately via email, thus reducing your workload and accounts receivable risk.

CLASSES OF PROGRAM BUSINESS

NON-PROFIT DIRECTORS' & OFFICERS' LIABILITY

We are able to write programs for virtually all classes of non-profit D&O including:

- Associations that have set up programs for their members
- Community Centres
- Historical Societies
- Legions
- Museums
- Professional Trade Associations
- Recreational Clubs
- Social Clubs
- Sports Clubs

PROFESSIONAL LIABILITY

We focus on many classes of E&O for program business including:

- Associations that have set up programs for their members
- Bookkeepers and Accountants
- Fitness Professionals
- Graphic Designers
- Management Consultants
- Personal Counsellors / Social Workers
- Placement Agencies
- Therapists

REGULATED HEALTH PROFESSIONALS

We focus on regulated health professionals with a focus on program business written on a mandatory basis through an association.

COMMERCIAL PACKAGE

For most programs we have the ability to add a CGL and/or Commercial Package component.
